IT Group Mans Auldyn Construction's Dynamics NAV

IT Group have secured the contract to support the Dynamics NAV software utilised by Isle of Man based construction company, Auldyn Construction.

The contract will see Auldyn Construction upgrading to a SQL platform, moving from an unsupported version (3.60) to NAV 2009.

"Since signing with IT Group life has been a lot easier. The staff always return calls and emails and are the most helpful support team I have ever dealt with. I am looking forward to implementing the new system and working with IT Group further." Chi'Na Brew, Accountant, Auldyn Construction.

CCG Choose ITGI

IT Group are pleased to have secured the support contract for CCG's Dynamics NAV software.

With over 30 years of experience, CCG are a pioneering construction and property development company offering the full range of construction services. With a desire to be the best and to perform at peak output, CCG have chosen IT Group as a company that will support them effectively enough to deliver on this company ethos.

WH Brown Selects IT Group

IT Group International are pleased to have secured the support contract for WH Brown Construction's Dynamics NAV software.

Brown Construction has been providing quality Construction services in the East of Scotland for almost 40 years. With a project portfolio ranging from commercials and industrials through to education and health, WH Brown are committed to successful delivery of all projects undertaken.

Having taken over the support of W H Brown's NAV software, IT Group intend to work together to upgrade them onto a supported version of NAV, NAV 2009.

IT Group International Supporting Southdale

Southdale has signed over the support contract for their Dynamics NAV Software to IT Group International.

Operating throughout the North of England, Southdale has 20 years of experience in the development of mixed tenure communities, providing low cost housing for rent and sale.

IT Group intend to upgrade Southdale from an unsupported version of NAV (3.60) onto the latest version (NAV 2009) , with a view to migrate their construction software to our feature-rich, future proofed solution - NAV2CIS.

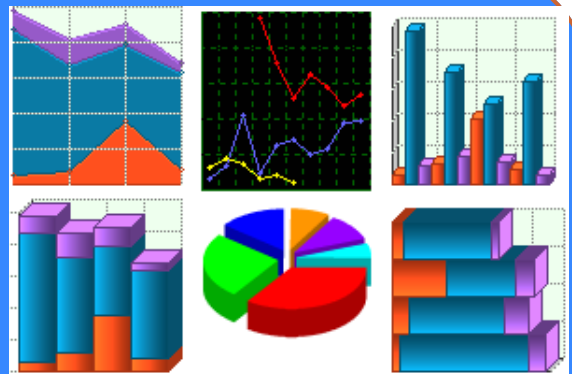

Spotlight on... SQL Server Reporting Services (SSRS)

Microsoft are encouraging customers to use existing Microsoft Dynamics Business Intelligence technology over Crystal Reports– the reporting technology from SAP. Using SSRS as a development platform for Dynamics, there is no extra cost to the customer. Those who have SQL Server no longer need to go elsewhere for reporting tools, this now comes as one fully integrated package.

Since Microsoft are now focusing on promoting SSRS to customers, they are no longer supporting Crystal Reports. Previously customers could buy licenses and find Crystal Reports on the Dynamics Price List. As a direct competitor, Microsoft has decided to focus fully on SSRS, as they believe this is the perfect fit for their customers.

IT Group International sells, implements, develops and supports Dynamics NAV, Dynamics CRM and SharePoint. Therefore, in conjunction with Microsoft, we will be steering customers towards the fully integrated stack, which includes SSRS. With no extra cost to the customer on a SQL Server Database, this robust and easy to use reporting tool is the perfect alternative to others such as Crystal Reports.
